PROFESSIONAL SUMMARY

Ambitious Software Engineer and Project Manager with over 8 years of experience in software development, project management, and business administration. Combines strong expertise in front-end and back-end development, database design, and modern technologies with advanced project management skills, team leadership, and operational coordination. Holds a bachelor's degree in informatics engineering – Software Engineering from Damascus University with a GPA of 3.75, complemented by prestigious professional certifications from IBM, Google, and the University of Alberta. Currently pursuing a Cybersecurity Analyst Professional Certificate from IBM. Possesses strong leadership and analytical abilities with a proven track record of working in multidisciplinary teams to achieve technical and administrative excellence.

PROFESSIONAL EXPERIENCE

Project Manager – Software Development – Business Administration
XCore Company | January 2026 – Present

- Managing software projects through full lifecycle planning, execution, and monitoring using Agile methodologies to ensure on-time and on-budget delivery.
- Overseeing software development operations and coordinating cross-functional teams to achieve the highest quality and performance standards.
- Driving business operations and administrative processes, analyzing market needs, and formulating strategies to drive company growth.
- Optimizing workflows and implementing administrative policies that enhanced team efficiency and increased customer satisfaction.

Programming Instructor
Sun Development Center | February 2023 – December 2023

- Delivered specialized training courses in programming languages and web application development across multiple proficiency levels using interactive modern teaching methodologies.
- Collaborated with industry experts to continuously develop and update training materials in line with the latest software technologies.
- Designed interactive learning activities to enhance trainee understanding and practical application of programming concepts.

- Supervised trainee performance evaluations and provided constructive feedback to foster skill development.

Systems Analyst
Cham International Virtual School | January 2023 – June 2023

- Analyzed customer needs and accurately defined system requirements, delivering tailored solutions that met technical objectives and expectations.
- Assessed security challenges and developed effective protection solutions to ensure data integrity and information confidentiality.
- Prepared System Requirements Specification (SRS) documents and coordinated between development teams and clients to ensure high-quality solution delivery.

Software Developer
Freelance | 2017 – Present

- Designed and developed interactive, user-friendly front-end interfaces using HTML, CSS, Angular, and Blazor with a strong focus on user experience (UX).
- Built and maintained server-side solutions using ASP.NET, NodeJS, and ExpressJS, ensuring high performance and scalability.
- Designed and managed databases using Microsoft SQL Server, SQLite, and MongoDB, optimizing queries for enhanced efficiency.
- Developed cross-platform desktop applications using .NET technologies.
- Applied Agile/Scrum methodologies for project management to ensure timely delivery.

IT Support Specialist
Freelance | 2015 – Present

- Provided technical support and troubleshooting for software, hardware, and network issues.
- Performed system maintenance, software installation, and ensured continuous operational efficiency.

EDUCATION

Bachelor of Informatics Engineering – Software Engineering
Damascus University, Damascus, Syria
February 2020 | GPA: 3.75 / 4.0

SKILLS

Technical Skills:

- Program language: JavaScript, Python, C#, Java, C++
- Frameworks: .NET, Django, NodeJS, Angular
